

Netflix Shows Case Study

by Maxym Voytovych

Date and Location: September 16 2022, Lviv, Ukraine

Main objective: See the distribution of Netflix shows by different categories.

Data: Data is taken from free public source, you can check it yourself after opening this link

<https://www.kaggle.com/datasets/shivamb/netflix-shows>

Analysis tactics: I will clean up a dataset, add a few helping columns and create some visualizations.

Result sheet: 📊 Netflix Data

After cleaning the given dataset by adding such columns as(main_production_country, year_added, is_anime) that will help us visualize data in a more clear way I created some plots.

Number of movies added each year

Percentage of Anime Shows

Number of Movies/ TV Shows comparison
